1 Joose Traffic to Commist Chine

ER- file

1. At the U.S morting of 16 March, there was excellentation of the question whether recent ship movements to and from Communist China indicated my unusual greath in such traffic. We requested wild and the Department of Dereses to prepare as appropriate memoratdes covering this Wallie and indicating, to the degree rossible. the nature of cargo. We asked that this movemble be formered to you for your use is occased that with the over-all problem of trude atto commist ates.

2. I as mostitling this agency's statement and apporting tables as occas traffic to Communist China during the period 1951-1995. Unfortunately, it was not possible to develop a statement laintly with the Department of Defence at this time, although the anipolog tables included with this mesorables were sunstructed in collaboration with Odi. It is my understanding that the Department of Colemne will somet a separate statement on this subject.

# Coan Wraffic to Communist China

Although with the European Satellites and the USA have furnished arms, emporition, and military equipment to demounts thins, the LODE has been by far the larger supplier.

the seaborne imports of domminist unine have been subjected to an intensive serutiny by the and allied intelligence agencies. There have been some reports of sectorne salpments of area and smealthon to Thins, Largely from European Communist Plot porce, but in spite of the legic of such shipments and in spite of the intensive intuitions effort, cearly all of these reserts of specific shipments remain unconfirsed. In the other hand, a large proportion of the memberne imports constitute stratesic rev materials, machinery, and equipment subject to embargo by the countries participating in the Coordinating Committee and the China Committee in Paris. The Cources of these shipments of strategic goods, in order of importance, are, (a) the surspean communist Sloc, (b) non-Mice countries not participating in the Mabargo against Josephnist China, and (c) western traders who evade expert and other controls and ship goods in violation of the embargo. Because of a difference in the controls applied against China and the remainder of the Communist Moc, the goods moving from European sloc ports also include large quantities exported legally to the Suropean Communist Misc by Sestern countries and transshipped to Communist Chins in frustration of the embargo on export of these cools to Chima.

in the volume of shipping arriving in Communist China from foreign parks. Fotal ship arrivals were 532 (1752), 826 (1753), and 956 (1954). Increase stonage totals were 2,357,000 (1952), 3,936,000 (1753), and 4,354,000 (1954). In January 1952 there were 39 ship arrivals (165,000 (187) as compared with 77 ship arrivals (165,000 (187) in January 1952. Son-Communist Bloc tennage in this trace increases from 76% in 1952 to dix in 1954. The increase in thinese imports, however, has not been proportional to the increase in ship tennage.

Caring the past few years the seaborne cargo arriving in Communist which from all sources totalled 1,100,000 metric tone in 1952, 1,500,000 metric tone in 1951, and is estimated in excess of 1,300,000 metric tone in 1954, retween one-third and one-half of the total goods carried

a This is a preliminary Figure and will be reised somewhat efter further comparison of available data.
